SUMMARY

Software Engineering student seeking a Full-Stack or Backend Software Engineer internship. Experienced in independently developing end-to-end web applications and collaborating on microservices-based systems. Strong interest in clean architecture, DevOps, and AI-assisted software engineering.

EDUCATION

Bachelor of Engineering in Software Engineering

University of Information Technology, Vietnam National University Ho Chi Minh City

Expected June 2028

2024–2028

Relevant Coursework: DevOps, Software Development, AI agent orchestration

PROJECTS

MowStudio

Full-Stack Developer, Personal Project

July 2026–Present

Next.js, TypeScript, PostgreSQL

- Independently developed an end-to-end platform for customers to book photo, podcast, and music studios and for staff to manage rooms, schedules, and bookings.
- Implemented real-time availability, guest and authenticated booking flows, role-protected admin dashboards, and SePay/VietQR payment processing.
- Structured a modular monolith with service–repository boundaries, Prisma, Supabase Auth, and PostgreSQL transactions to prevent booking conflicts.
- Established CI quality gates across 60+ unit and integration test files and critical Playwright E2E flows; added Sentry monitoring and health checks.

Chat Server Microservices

Infrastructure & Software Developer, Four-Member Academic Team

January 2026–June 2026

Java, Spring Boot, gRPC

- Collaborated on a Discord-inspired real-time messaging platform comprising 12 microservices and 15 Maven modules.
- Developed shared DTOs, exceptions, and utilities in `common-lib`; defined Protocol Buffers contracts and reusable gRPC stubs.
- Built `file-service` with MinIO object storage, 10 MB uploads, and automatic image thumbnails; implemented event-driven audit logging with RabbitMQ and Loki.
- Contributed to infrastructure architecture and UI/UX using Docker, Kubernetes, Jenkins, Prometheus, Grafana, and Java Swing.
- Earned 9.5/10 in Java Programming, 9.5/10 in Microservices, and 10/10 in DevOps.

TECHNICAL SKILLS

Programming Languages: Java, TypeScript, JavaScript, C#, PHP, SQL, HTML/CSS

Frameworks: Next.js, React, Spring Boot, Spring Cloud, .NET, Laravel, Node.js, Express

Data & Architecture: PostgreSQL, MySQL, SQL Server, Prisma, REST APIs, gRPC, WebSocket, RabbitMQ, Microservices

DevOps & Testing: Docker, Kubernetes, Jenkins, GitHub Actions, Linux, Prometheus, Grafana, Loki, Vitest, Playwright

AI-Assisted Engineering: Claude Code CLI, OpenAI Codex, Hermes Agent, OpenClaw; agent orchestration, debugging, testing, and technical documentation

LEADERSHIP & ACTIVITIES
